ALTIA

Welcome to our third Recruiting Newsletter for 2022/2023 recruiting season. Inside this and other newsletters you will find information about who we are at **ALTIA CENTRAL** and what we have to offer, from our locations to your future, and everything in-between. We hope it's helpful and answers some of your questions. Enjoy.

Meet Our Recruiter

Richard Freeman,

one of our full-time recruiters, is originally from North Carolina, USA and has been working with ALTIA CENTRAL since 2016. Like all of our supervisors, trainers, and recruiting team, he started as an ALT with ALTIA CENTRAL. However, Richard has a unique background working with various tech companies such as Apple, and has spent time working as a concert and event photographer. These accumulated experiences have been a great help enhancing our recruiting department in areas such as interviewing, website creation, database management, and more! Richard has been the best addition to our team and he is working closely with our Recruiting Manager to share the workload and develop new strategies and materials for finding those dedicated ALTs who can best serve our schools and children with purpose and enthusiasm.

Area Spotlight

Takahashi is a beautiful, suburban castle town about an hour from Okayama City. Its castle, while small, is one of only 12 original castles still standing in Japan. There are numerous museums and historical locations too, so it's a great place for anyone who wants to live among the rich history of Japan.

AC Alumni

Anonymous - I am a software engineer at an application security company called Contrast Security; but, just recently accepted position as a software engineer at the New York Times! Super excited to start working there!

While working at ALTIA CENTRAL a creative side of me that had been buried for quite a bit, had been exposed while developing activities for the kids. I wanted to take things further and help create/build software that can make an impact on people.

A Note from our Recruiting Team

Our Recruiting Team is well into the fall interview season which will continue into February 2023. We are accepting all applications in preparation for our next big intake of new ALTs for April 2023, as well as, accepting in-country applications for any sudden openings that may come this fall and winter. All of our interviews are conducted virtually using Google Meet. If you are interested in applying, please visit our Recruiting website for further details about ALTIA CENTRAL.
